Gaurang Parmar

Vadodara, Gujarat | gaurangp830@gmail.com | +91 97372 88830 | Gaurang Parmar

Professional Summary

Results-driven Software Engineer with 4+ years of experience in full-stack web development, specializing in PHP, Laravel, RESTful API development, and modern JavaScript frameworks. Experienced in building scalable SaaS applications, multi-tenant platforms, CRM systems, project management solutions, and web and mobile application backends. Strong knowledge of database design, query optimization, authentication, authorization, and Role-Based Access Control (RBAC). Hands-on experience with React.js, Next.js, Vue.js, and MySQL, with a focus on writing clean, maintainable, and secure code.

Education

Gujarat Technological University, Ahmedabad – *Master of Computer Applications (MCA)* **2015 – 2017**
Shri Chimanbhai Patel Institute of Computer Applications, Ahmedabad

Experience

Consumer Sketch – *PHP Developer* **October 2025 – Present**

- Develop and maintain SaaS-based web applications using PHP, Laravel, React.js, and Next.js.
- Contribute to enterprise platforms, including Project Management System and Align Pro, supporting multi-organization and multi-tenant architectures.
- Design, develop, and maintain scalable RESTful APIs for business-critical application workflows.
- Implement backend business logic, database operations, authentication, and role-based access control.
- Develop and integrate responsive frontend interfaces with backend APIs.
- Optimize database queries and application performance while maintaining code quality and system reliability.

iCoderz Solutions Pvt. Ltd. – *PHP Developer* **October 2023 – July 2025**

- Developed and maintained web applications and RESTful APIs using PHP and Laravel.
- Implemented backend business logic, database operations, validation, and API integrations for web and mobile applications.
- Integrated third-party services and external APIs to support application functionality.
- Identified and resolved application bugs, improving system stability and reliability.
- Collaborated with frontend developers and cross-functional teams to deliver application features.

Webcreta Technologies – *PHP Developer* **August 2022 – September 2023**

- Developed dynamic web applications and backend functionalities using PHP and Laravel.
- Designed and implemented RESTful APIs and database operations.
- Built CRUD modules, business logic, and server-side validation.
- Resolved technical issues and implemented application enhancements.

Projects

Project Management System

Tech Stack: PHP, Laravel, Vue.js, MySQL, JavaScript, Bootstrap, jQuery

- Designed and developed a Jira-inspired project management platform to manage projects, tasks, sprints, and team activities.
- Implemented task assignment, dynamic workflows, priorities, status tracking, and project progress monitoring.
- Developed a Leave Management module with employee leave requests, leave balances, and manager approval workflows.
- Implemented custom Role-Based Access Control (RBAC) and multi-organization functionality with isolated organizational data.
- Optimized database queries and backend operations to improve application performance.

Align Pro – Lead Management & CRM Platform

Tech Stack: Next.js, React.js, PHP, Laravel, MySQL, REST APIs

- Contributed to a scalable lead management and CRM platform using Next.js and React.js with Laravel backend APIs.
- Implemented workflows to create, assign, track, and manage leads throughout the sales pipeline.

- Developed lead conversion workflows to transform qualified leads into active projects with automatic resource mapping.
- Built secure RESTful APIs with JWT-based authentication and role-based access control.
- Developed dynamic dashboards for lead tracking, project monitoring, and role-specific operations.

Driveo – Taxi Booking Application

Tech Stack: PHP, Laravel, MySQL, REST APIs

- Developed RESTful APIs for user registration, authentication, and profile management.
- Implemented taxi booking functionality, including ride requests, driver assignment, and booking status management.
- Developed driver management APIs for driver profiles, availability, and ride operations.
- Integrated live location tracking and payment gateway APIs for ride updates and secure online transactions.

Hospital Management System

Tech Stack: PHP, Laravel, React.js, MySQL, REST APIs

- Developed a hospital management platform with React.js frontend and Laravel backend.
- Implemented patient registration, doctor scheduling, appointment booking, and appointment management.
- Built billing and payment management modules to streamline hospital operations.
- Implemented RBAC for administrators, doctors, nurses, and receptionists.

Blaxity – Dating & Lifestyle Platform

Tech Stack: PHP, Laravel, MySQL, Vue.js, REST APIs

- Developed and maintained backend RESTful APIs for web and iOS applications.
- Implemented user authentication, profile management, and membership verification workflows.
- Developed real-time chat functionality and privacy-focused features, including anonymous messaging and private photo management.
- Built user discovery and search functionality with filters based on preferences, location, and availability.

Surya Namskar – Gujarat Government Project

Tech Stack: PHP, Laravel, MySQL, REST APIs

- Developed and maintained backend RESTful APIs for a Gujarat Government-based application.
- Implemented user management, data validation, database operations, and API integrations.
- Focused on secure data handling, application performance, and data consistency.

Vir Security & Man Power Services – Employee Management System

Tech Stack: PHP, Laravel, MySQL, Bootstrap, JavaScript

- Developed a web-based administration panel for managing employee records, profiles, and workforce information.
- Implemented employee attendance tracking and daily attendance management.
- Developed payroll calculation functionality and CRUD operations for employee and attendance records.

Technical Skills

Backend: PHP, Laravel, MVC Architecture, RESTful API Development

Frontend: JavaScript, React.js, Next.js, Vue.js, jQuery, AJAX, HTML5, CSS3, Bootstrap

Database: MySQL, Database Design, Relationships, Query Optimization

Security: Authentication, Authorization, JWT, Role-Based Access Control (RBAC), Input Validation

Integrations: Firebase, Push Notifications, Payment Gateway Integration, Third-Party APIs

Architecture: Multi-Organization Systems, Multi-Tenant Applications, Subscription Management, File Storage Management

Tools & Practices: Git, GitHub, Debugging, Production Support, Clean Code, Performance Optimization

AI Tools: Antigravity, Cursor AI, Claude AI, ChatGPT

Languages: Hindi, Gujarati, English
